

iPhone Synchronization Instructions

Date: April 20th/09

Please follow the following steps to synchronize your iPhone with your Register.com email.

Step 1: Press the “Home” button on the bottom of your iPhone.

Step 2: Select the “Settings” icon.

Step 3: Select the “Mail, Contacts, Calendars” icon at the bottom of the screen.

Step 4: Select “Add Account”.

Step 5: Select "Other".

Step 6: Enter in the name that you want recipients to see when they receive email from you under the “**Name**” section.

Step 7: Enter your email address under the “**Address**” section.

Step 8: Enter your password in the “**Password**” field.

Step 9: Select the “**Save**” icon in the upper right hand corner of the screen.

Step 10: Select “IMAP”.

Step 11: Enter your “Incoming Mail Server” Information.

Note:

The “**Host Name**” is **mail.domain.com**. Replace **domain.com** with your actual domain name. (Example: mail.johndoe.net)

The “**User Name**” is your full email address.

The “**Password**” is your email address password.

Step 12: Scroll down to the “**Outgoing Mail Server**” and fill in the required fields.

Note:
The “**Outgoing Mail Server**” settings are the same as the “**Incoming Mail Server**” settings. Complete with the same details entered in Step 11.

Step 13: Select the “**Save**” icon in the upper right hand corner once you have completed filling out the “Outgoing Mail Server” information.

Step 14: If presented with an error stating “Secure Connection Failed” “The Certificate for you@domain.com may not valid or “Secure Connection Failed” “The Certificate for SMTP: you@domain.com may not be valid”, please press “**Continue**”. Both of these errors are normal. Please view screen shots below.

Congratulations!

You have successfully set up your iPhone with Register.com's email service.
